

EAST DENVER NATURAL GAS PROJECT

Construction In Your Area

Construction

The intersection of 16th Avenue and Clarkson Street will be fully closed on July 11 and 12 for natural gas line installation. Schedules are subject to change.

During work, you may notice:

- Marking of utility lines and utility survey holes
- Road and sidewalk closures with parking restrictions
- Temporary changes to access
- Construction noise
- Work area restoration as weather allows

During this work, Clarkson Street between Colfax and 17th avenues will temporarily operate as a two-way street to maintain local access. Through traffic should follow posted detours.

We will install the natural gas line by open trenching and boring.

Overview

Xcel Energy is working in your area to replace approximately one-half mile of natural gas line along Clarkson Street between 14th and 18th avenues in Denver, Colorado.

This work will allow us to continue to provide safe, reliable natural gas service throughout the community.

Safety

The safety of the public around Xcel Energy's natural gas system influences every decision we make. If you suspect a natural gas leak, leave your home or business immediately. Once you are safely away, call **911**, then Xcel Energy at **800-895-2999**.
